LINE 5300**Compression fittings with cut
brass olive****COMPREX**

DESCRIPTION

Brass olive compression fittings for multilayer pipe (line 5300) are suitable for hot and cold water supply in sanitary and heating installations and for any kind of sanitary installation such as domestic, commercial, industry and farming. They can be used with any type of non-corrosive fluid.

The seal is guaranteed by the mechanical tightening of the fitting and the compression of the O-Ring of the pipe holder.

ADVANTAGES

- Wide range
- For drinking water and heating
- DVGW certified
- Raw materials complying with UBA LIST
- No contact between nickel and water

ASSEMBLY INSTRUCTIONS

Cut the pipe perpendicularly to its axis using an appropriate pipe-cutting tool [code TT500.00].

Calibrate the pipe using special reamer [code CS50.00, MA00.90], removing possible residual chips. The pipe edge should be trimmed throughout the circumference.

Insert nut and olive on the pipe.

Insert the pipe in the body until it stops. With an hexagonal wrench, tighten the nut until reaching the number of threads shown in the table (see previous page).
